0.0	0.0	Photos of interest along California State Highway #S 24	Part of the Colorado River, Imperial Dam Irrigation system. This portion, is part of the All American Canal System	0.1	0.1
0.0	0.0	Photos of interest along California State Highway #S 24	Part of the Colorado River, Imperial Dam Irrigation system. The Imperial Dam is the headworks and origin for the All American Canal, which is the main source of water for the Imperial Valley. It is one of a few major structures on the lower Colorado River, such as the Hoover Dam and the Parker Dam, built by the Bureau of Reclamation to control flooding and to supply water for irrigation.	0.1	0.1
0.0	0.0	Photos of interest along California State Highway #S 24	Part of the Colorado River, Imperial Dam Irrigation system.- Located about 20 miles northeast of Yuma, Arizona, Imperial Dam is the diversion point for water flowing from the Colorado River to the All-American Canal, which serves Imperial and Coachella valleys. Imperial Dam was a first for the world of irrigation, where river water would be held and then diverted into a giant desilting plant before being released into the All-American Canal.	0.1	0.1
