| 15.5 | 25.0 | Monroe County, Florida | Northern County Line. Discovered by Ponce De Leon on May 12, 1513, the Florida Keys proper are an elongated, arcuate chain of low lying islands over 220 miles in length. They extend from the southeastern tip of the Florida peninsula to the Dry Tortugas and lie between the Gulf of Mexico and the Atlantic Ocean. The Keys are separated from the mainland by Biscayne Bay, Barnes Sound, Blackwater Sound and Florida Bay. | 112.3 | 180.8 |

| 21.0 | 33.8 | Junction of County roadway # 905 (Card Sound Road) | East to Key Largo Hammocks Botanical State Park. Access to Dagny Johnson Key Largo Hammock Botanical State Park. The park contains the largest remaining fragments of rockland hammock in the continental United States. Once a dominant habitat type in the Florida Keys and southern tip of Florida's peninsula, this West Indian plant community was originally established largely by migratory birds. Northbound migrant songbirds, having fed on the fruits of trees and shrubs in the Bahamas, Greater Antilles, and Yucatan Peninsula of Mexico, often carry seeds in their digestive tract. Many tropical species are resident here, including the white-crowned pigeon, mangrove cuckoo and black-whiskered vireo. Tropical vagrants such as the thick-billed vireo and La Sagra's flycatcher are frequently reported in the park. | 106.9 | 172.0 |

Tent campers can hide away in the shady hardwood hammock near Sandspur Beach. Buttonwood Campground, on the west end of the island, accommodates almost any size camping rig. Both areas have water and electric on most of the sites and bath houses. There are 3 campgrounds in the park. Bahia Honda is a very good place to see wading birds and shorebirds. There are shallow sand flats during low tide on the ocean side of the island where the birds feed and rest. A variety of shorebirds including Willets, Sanderlings, Ruddy Turnstones, Short-billed Dowitchers and Plovers may be seen along the shore feeding and resting. Several species of wading birds may be seen in the park as well. These include Great White Herons, Great Blue Herons, Tri-colored Herons, Great Egrets, Snowy Egrets and White Ibis. | 124.3 | 200.0 | City of Key West, Florida | Key West lies near the end of the chain of islands known as the Florida Keys, and is the southern-most city in the continental United States. The island-community is located about 90 miles north of Cuba. Key West's long and colorful past begins with its European discovery in 1513 by Ponce de Leon. The island was first known as Cayo Hueso (Isle of Bones) because it was littered with remains from an Indian battlefield or burial ground. The name 'Key West' is the English version of the Spanish term. The first permanent occupancy in the City occurred in 1822, complete with a small naval depot, whose purpose was to rid the area of pirates. | 3.6 | 5.8 |
